

Product Overview

This pair of straight splice plates joins cable tray sections end to end, completing both the structural and the electrical connection between runs.

- Sold as a complete pair with fastening hardware
- Includes sixteen 3/8" x 3/4" ribbed-neck screws and sixteen 3/8" flanged hex nuts
- Ribbed-neck screws grip the side rail to prevent rotation during tightening
- Electrical resistance across the coupling is less than 0.00033 ohms per NEMA VE1, so no bonding jumpers are required
- Splice plates are included with ladder sections and fittings; spares for field cuts are available separately
- Install per NEMA VE2 cable tray installation guidelines
